CORE COMPETENCIES

- **Threat Intelligence Operations:** IOC investigation, threat correlation, adversary TTPs analysis, feed integration across EDR/XDR/SIEM platforms
- **Threat Hunting & Investigation:** Deep IOC searches, AI/ML-assisted query construction, cross-platform log correlation, XDR Cloud Data Lake forensics
- **Cloud Workload Protection (CWPP):** Kubernetes/Docker runtime security, container threat detection, attack surface discovery across AWS/Azure/GCP
- **Security Intelligence Architecture:** Threat detection workflow design, SIEM integration, OSINT/commercial/dark web feed orchestration
- **Enterprise Pre-Sales Excellence:** 25+ years delivering POCs and evaluations demonstrating threat detection efficacy, threat intelligence value, and security posture improvement for Fortune 500 enterprises

PROFESSIONAL EXPERIENCE

Senior Sales Engineer

SentinelOne

November 2021 - August 2025

- **Architected threat intelligence integration workflows** connecting 3rd party feeds (OSINT, commercial, dark web) into XDR Cloud Data Lake, enabling cross-platform IOC enrichment and automated threat correlation for Fortune 500 customers
- **Executed advanced threat hunting operations** conducting deep IOC searches across endpoints, cloud workloads, and containers using AI/ML-assisted query construction, reducing MTTD by mapping adversary TTPs to MITRE ATT&CK framework and identifying lateral movement patterns
- **Deployed CWPP solutions across Kubernetes environments** providing runtime container security, workload threat detection, and CI/CD pipeline integration for continuous security validation in cloud-native deployments
- **Served as AI SIEM specialist for SE team** leading Purple AI beta program and customer enablement, reducing false positives by 40%+ through automated threat correlation, and accelerating incident triage through AI-driven indicator extraction
- **Mentored junior sales engineers and account managers** on threat intelligence methodologies, AI SIEM workflows, CWPP deployment strategies, and complex POC execution, accelerating team productivity and technical win rates

SR Enterprise Sales Engineer

McAfee

April 2005 - November 2021 (16+ Years)

- **Orchestrated cloud migration strategy** transitioning enterprise customers from device-only to device-to-cloud protection with centralized threat visibility, log correlation, and SIEM integration across hybrid environments
- **Delivered critical incident response** providing outbreak containment, forensic analysis, and threat remediation during security incidents, improving customer security posture and driving renewal rates above 95%
- **Drove product innovation** delivering dashboards, detection queries, and threat hunting playbooks to Development and Product Management teams, resulting in shipped product enhancements
- **Led high-stakes technical evaluations** for DOW 30 and Fortune 500 prospects, demonstrating advanced threat detection, SIEM correlation, and incident response capabilities that resulted in multi-million dollar conversions

EDUCATION

Bachelor of Business Administration in Computer Information Systems

Georgia State University, Atlanta, GA
